

Telecom Industry Churn Dashboard

Presented by :
MOHD SOHEL

Churned Dashboard : This dashboard represents the complete churn data analysis report, including details such as the total customer churn, the number of churned customers in high contract ranges, and more.

Customer Risk : It provides a comprehensive analysis of customer risk data, including the percentage of churned customers, partner status, gender, contract type, the number of churned customers last month, churn rate by contract, payment method, and more.

Customer Information : This report appears to be a customer information dashboard, providing detailed insights into individual customer profiles, their account details, and subscription statuses. It also indicates the customer's status, whether they are churned or retained.
